Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael J. Schmidt on 08/29/05.

2. The application has been amended as follows:

- Claim 20, line 12, change "110" to --of--

3. The following is an examiner's statement of reasons for allowance:

The instant application is directed to an operating device in a vehicle for operating multiple systems. Each independent claim identifies the uniquely distinct combination of features including "an electronic control unit receiving signals from the operating panel and controlling the display unit, wherein the number of times of use of each operation item in every system is counted and, if an operation item has been used more frequently than other operation items in every system, the more frequently used operation item is moved to a higher-level screen". This patentable distinction is included in all independent claims 1 and 20. The closest prior art, Wako et al. (US 6,415,224) and Haimi-Cohen (US 6,760,431). Wako et al. disclose display method and apparatus for navigation system, and Haimi-Cohen discloses methods and apparatus for identification and user prompting for storage of frequently used data items. The references, either singularly or in combination, fail to anticipate or render the above limitations obvious.
